**Topic:** Policy

---

## **Main Points:**

### **1. LoRa Module for Transmitting Data**

- Two functions for volume transfer:
    - Send SOC (State of Charge) every **5 seconds**
    - Receive for continuous use
  - Used for:
    - **Forward** and **Stop** (can be used for stopping as well)
- 

### **2. Safe Protocol for Voice Transmission**

- Control **motor speed**
  - Works without any microcontroller
  - Can be configured in both **online and offline** modes
  - Works **synchronously**
-
